School of Materials Science and Engineering, Sun Yat-sen University, Guangzhou, 510275, China

Abstract: In this paper, The main components of CVD experimental apparatus are introduced. Meanwhile, we have successfully constructed a CVD experimental apparatus with practicable, reliable, and safe performance. The carbon nanotubes loaded on carbon paper (CNT @CP) are successfully prepared in this CVD experiment apparatus. This apparatus and its experimental teaching application can help students of materials majors to further master CVD material preparation method.
